Daily Work Report — 2 November 2026

1. Tasks Completed Today

- Researched mobile app and game ideas for Android and iOS.
- Explored potential opportunities in the Pakistani and international markets.
- **Shortlisted three mobile app concepts:** AI Study Planner, Business Order Manager, and AI Document Scanner.
- **Shortlisted three mobile game concepts:** Logic & Arrow Puzzle, Mini Restaurant Simulator, and Color Sorting Puzzle.
- Prepared individual visual concept mockups for all six shortlisted ideas.
- Researched initial marketing strategies, including social media promotion, short-form videos, influencer collaborations, and App Store Optimization (ASO).

2. Work Evidence

- App dashboard and feature-screen concepts prepared.
- Game home-screen and gameplay concepts prepared.
- Initial marketing strategies documented for all six ideas.
- No GitHub commits, functional builds, demo links, or published marketing videos yet, as today's work focused on research and concept design.

3. Current Project Status

Project Name: Not decided yet

Platforms: Android and iOS

Overall Progress: Initial research and concept-design phase completed. A total project completion percentage is not yet estimated because the development scope has not been finalized.

Today's Deliverables:

- Three app ideas shortlisted.
- Three game ideas shortlisted.
- Six visual concept mockups prepared.
- Initial marketing approaches identified.

Expected Completion Date: To be determined after selecting the first app and game and finalizing their development scope.

4. Pending Tasks

- Conduct competitor analysis for all shortlisted concepts.
- Research similar apps and games, including ratings, reviews, features, and market demand.
- Validate the selected ideas with potential users.
- Finalize one app and one game for the first development cycle.
- Prepare detailed UI/UX designs and functional prototypes.
- Research monetization options and prepare detailed marketing plans.

5. Tomorrow's Plan

- Analyze competitors for the shortlisted apps and games.

- Compare their features, strengths, weaknesses, and user feedback.
- Research market demand and potential monetization strategies.
- Identify the most promising app and game for development.
- Prepare a competitor comparison and recommendations.

6. Issues / Blockers

- No major blockers at the research stage.
- Final development planning depends on selecting the first app and game.
- Flutter development knowledge and technical implementation planning will need to be addressed before cross-platform development begins.

Overall Summary

Today’s focus was on market research, idea selection, visual concept creation, and initial marketing research. Six concepts have been shortlisted and visualized. The next step is competitor analysis and selecting the first development projects.
